Ethiopian Airlines Boeing 737 Max Crash 2019

0.1 Opening and accident(Yau)

Page 5, timeline, Top Gun Goose!!!!!!!!!!!!!!!!!!

0.2 Immediate Cause: MCAS(Manufacturer)(Nam)

Normal situation: MCAS system remains idle, sensors tracking the angle of the airplane MCAS system action:

Adjusts the horizontal tail, Lower the nose of the airplane

0.2.1 How MCAS Works?

It is automatic

0.3 Root Casues: Pilot(Experience)(Starry)

0.4 Root Casues: Boeing(Company)(Haru)

Lower the cost

0.5 Ethical implication 1: Boeing(Haru)

0.6 Ethical implication 2: MCAS(Nam)

Advise

0.7 Ethical implication 3: pilot(Starry)

0.8 Conclusion

0.9 Remark

Summarize all the point in the last slide /no thanks Open with clearer purpose Learn lesson from the case, in order to prevent same case Give overview Go through slides Have heading to connect the slides Heading not clear enough Slide 9 have more clear heading, label the 3 issues Overview of the 3 issues beforehand Transition need to be more Clear Ethical implication of what, a more helpful title

Try not to repeat each other's word

Need heading to go to second issue

Talk about the MCAS first as it is the immediate case

Add more pic instead to have a clear understanding Too hard for them to follow, instead of Z, simple straight arrow

Circle for slide 17 for the loop

Need heading for slide 19, review the slide by title

My cause is not clear enough, misunderstood into overview

Slide 20, when saying the advice, could have suggested what could be done instead of dividing into 2 slides Operational at the end

Not too consistent

The 3 dots slide no heading

The starry too complicated

Less cute
